

Patients,

Tired of increasing drug prices, experiencing issues accessing medical or pharmaceutical care, and are your copays getting more expensive?

We are here to help!

Q DO YOU KNOW WHAT PHARMACY BENEFIT MANAGERS (PBMS) ARE?

A PBMS ARE THE MIDDLEMEN IN THE PHARMACEUTICAL SUPPLY CHAIN, & THEY ARE PROFITING AT YOUR EXPENSE!

OUR MISSION: TO REFORM PBM PRACTICES IN MISSOURI.

You deserve better...

Transparency: Purchasers should receive the rebates drug manufacturers provide to reduce costs. Covered drugs should be a clinical decision, not which drug produces the largest profit for PBM's. Health care providers have a clearer understanding of drug formularies and can thus make better-informed decisions for their patients.

Spread Pricing: Ensure plans and patients know what they are being charged by the PBM versus what the PBM pays to the pharmacy.

Rebate Pass-Through: Rebates from manufacturers are meant to lower drug costs to patients and plan sponsors, not increase prices so manufacturers can pay larger rebates to PBM's to pocket and divert away from patient and plan sponsor discounts.

CONTACT WITH LEGISLATORS IS KEY.
DO THIS IN 3 EASY STEPS:

- 1** Visit stoppbmabuse.com
- 2** Click "Patients"
- 3** Click "Contact Your Legislator Here"
