

# StopPBMAbuse

Are you tired of increasing drug prices? Are you experiencing issues accessing medical or pharmaceutical care? Are your copays getting more expensive? **We are here to help!**

- Pharmacy benefit managers (PBMs) have inserted themselves between you and your doctor, pharmacist and health insurer - causing you hassles and higher prices.
- PBMs influence what consumers pay for medicines by controlling approved drug lists and setting prices.
- The PBMs think they can manage your prescription therapy better than your health care provider.

**Join our mission to protect patients by reforming and shining a light on PBM practices in Missouri!**

For more information, go to [stoppbmabuse.com](http://stoppbmabuse.com) or scan the QR code.

- The PBM industry pockets drug discounts meant for lowering your (the patient's) prescription costs, raising their profits at your expense.
- PBMs' below-cost reimbursements to providers are putting pharmacies out of business.
- Trump and Biden agree that the lack of PBM transparency has hurt patients' access to affordable and needed medications.
- PBMs' misalignment of incentives, excess pricing complexity, and a lack of transparency and oversight raises prices on payers and patients.
